Key Factors in the Cash Grain Bid / Basis Issue

• Inverses in the Wheat Futures Market \textsuperscript{CME} \textsuperscript{SRW, HRW}
  o Record high lead contract prices for \textit{Lead Futures} with \textit{high volatility}

• “Down Stream” Supply Chain Disruptions Impacting Grain Elevators
  o Lack of bids from \textit{wheat millers, exporters}, etc. to “\textit{move}” grain on to
  o Questions regarding availability of rail transportation to move grain

• A necessary \textit{“turnaround”} in the future
  o Eventually – “\textit{down stream}” buyers/users will again need wheat supplies
  o \textit{“Demand-pull”} will force \textit{proactive bidding & procurement} for wheat in these
    industries when current inventories run short & buyers “\textit{come calling}”
