Weed Management Schools

Join us to learn more about controlling weeds with during this time of unknown herbicide availability and challenging weeds.

We will learn about:
- Revisiting residual herbicides in corn
- Non-chemical approaches to deal with herbicide shortages
- Research update in application technology

Speakers:
Sarah Lancaster, K-State Extension Weed Scientist
Randy Lloyd, Univ of Neb Application Technology Research Coordinator
Tyler Meyers, K-State PhD Student

There is no cost to attend, but registration is highly encouraged by February 8th. Register at: www.northwest.ksu.edu/events

Contact your local Extension Office with any questions or for help with registration.
